### Gaps in HRP:

- Mitoli, Pallia, Phoolbhar & Rmia Behar has poor reporting of Anaemic pregnant women.
- It is a mandate to treat severe anaemic pregnant women at block facility level but many blocks have not reported( need to see whether services are not given or there is poor reporting).
- There is a sudden increase in hypertensive case identification in month of October need to check the data.
- DWH reported that 108% PWs are having hb<11 which is more than Pregnant womens need check.

### Gap in Complication and C-section

- 5 % complication are attended at the facility.
- There is confusion regarding reporting of complication at Mohammadi, Nighasan Kumbhi and Isanagar (All the oxytocin and antibiotics which are administered normally are reported as complication) need to verify the data.

**Gaps in Immunization**:

- No of Live births and BCG given not corresponding in some of the blocks as per the table. Against estimated BCG is only 73%.
- Bijua, Kumbhi, Pasgawa, Phardhan have poor reporting of Hep.B-0 dose to the total live births and rest blocks were not able to do so.
- Usually BCG, OPV0 and Hepatitis B0 doses are given at birth time but reporting shows all three are not given at the time of birth even at DH and CHCs, it is showing service gap at facility and need focus monitoring.

**Gaps in Immunization**: >100% >80, <=100 >=50, <=80 <50

#### Gaps in Family Planning:

- 42% of total IUCD perform at Subcenter till month so quality and quantity should be a concern to all Family planning mangers.
- There is poor availability of commodities like OCP and Condom at many blocks which has to be addressed.
