

## NATIONAL URBAN HEALTH MISSION

### Introduction

The National Urban Health Mission (NUHM) aims to improve the health status of the urban population in general, but particularly of the poor and other disadvantaged sections, by facilitating equitable access to quality health care through a revamped public health system, partnerships, community based mechanism with the active involvement of the urban local bodies.

### State Profile

According to the 2011 Census of India, 37.71 crores out of 121 crores Indians live in urban areas, this means 31.16 per cent of the country's population lives in cities. As per the 2011 Census 4.44 crore persons reside in towns and cities of Uttar Pradesh.

Total Population (In lakhs)	1,998.12
Urban Population (In lakhs)	444.95
Urban Population as percentage of total population	22.3%
Urban slum population (in lakhs) (as per DAP of 2013-14)	<b>142.88</b>
Slum population as percentage of urban population	32%
Number of Metro cities	0
Number of Million + cities (> 10 lakh population)	7
Number of cities with 1 to 10 lakh population	56
Number of towns with less than 1 lakh but more than 50 thousand population	59
Number of District HQs which have less than 50 thousand population but are covered under NUHM	9

### Urban Population as Percentage of Total Population and its Trend

Uttar Pradesh is one of the least urbanized states in India. As per the urbanization trends of 2011 census, Uttar Pradesh State is the 24th most urbanized and 11th least urbanized state in India with about 22.3 percent of urban population. Amongst the districts in the state, the lowest degree of urbanization (having much less than 5% urban population) is in the district of Shrawasti 3.45% and the highest degree of urbanization is in the district of Ghaziabad 67.5%.

Though the urbanization in the state (22.28%) is low in comparison to the national average of 31.16 percent as per the 2011 census and the urban decadal growth of the state during the last decade (2001-2011) has also shown low growth rate of 29.3 percent compared to the national growth rate of 31.8 percent. It is noteworthy that the State's population during the last decade has grown by about 21.4 percent while that of the urban population has grown at about 29.3 percent.

Urbanization is a natural consequence of socio-economic change taking place due to gradual and steady transformation of traditional rural economies into modern industrial economy. Mostly the phenomenon of urbanization is seen as an outcome of demographic outburst resulted from poverty driven migration from rural areas into urban settings. Different factors, classified as "urban pull factors" and "rural push factors", which are also the outcomes of globalization, liberalization and privatization are making urbanization a faster than before. The table below gives the percentage of

As per Census - 2011, there are 63 urban agglomerations/cities with more than one lakh population. The 7 urban agglomerations having more than one million populations in the state are Kanpur, Lucknow, Ghaziabad, Agra, Varanasi, Meerut and Allahabad.

### Urban Local Bodies in Uttar Pradesh

In 2001, there were only 704 towns in Uttar Pradesh, which has grown up to 915 in 2011. In other words, the urban population of the state has increased from 20.8% in 2001 to just 22.3 % in 2011. Among these urban towns, Government of Uttar Pradesh has 14 Municipal Corporations, 193 Municipal Councils and 423 town areas .

According to the data from the Census of 2011, cities and towns can be broadly classified as:

Class I: 100,000 and above

Class II: 50,000 to 1,00,000 people

Class III: 20,000 to 49,999

Class IV: 10,000 to 19,999

Class V: 5,000 to 9,999

Class VI: Less than 5,000 persons

And

Megacity: >5,000,000 population

Metropolis : 1,000,000-4,999,999 -

Sub-Metropolis : 500,000-999,999

In Uttar Pradesh, there are 648 Statutory Towns. All other places which are having minimum population of 5,000; at least 75 per cent of the male main working population engaged in non-agricultural pursuits; and the density of population is at least 400 persons per sq. km. are known as Census Town. In Uttar Pradesh, such towns have increased from 66 (2001 census) to 267 (2011 census). In the process numbers of villages have decreased from 107,452 to 106,704 in 2011

<b>Total</b>					<b>3,14,53,923</b>	<b>1,42,88,488</b>		

In case of city & towns falling under GB Nagar (indicated by \*), slum population is forming a major proportion of the total urban population due to unprecedented out growth areas and conversion of rural areas into unplanned urban clusters which are barely covered by any health care facilities. Hence costs have been budgeted to reach these populations by outreach services.

The Cantonment Board areas in the districts of Agra, Bareilly, Kanpur, Lucknow and Meerut are not planned for inclusion under NUHM activities or resources as the population here is already receiving health services from the Army Hospitals and there is negligible slum population in these areas. Any vulnerable population in the Cantonment areas will be covered with outreach camps or under activities from the nearest town as the need may be.

Districts Health Society is the implementing authority for NUHM under the leadership of the District Magistrate. District Program Management is being further strengthened to provide appropriate managerial and operational support for the implementation of the NUHM programme at the district level.

### Mapping and Listing of Slums and Health Facilities

GIS mapping and listing of slums was completed in 2009 in 14 cities (Agra, Aligarh, Allahabad, Hapur, Bareilly, Farrukhabad, Ghaziabad, Kanpur, Jhansi, Lucknow, Meerut, Saharanpur, Shahjahanpur, Varanasi) based on guidance from Government of India and with funding under NRHM. The GIS maps were prepared by Remote Sensing Applications Centre, Uttar Pradesh. This gave us fairly accurate lists and maps of slums in the 14 cities. Mapping of slums of other cities has been completed with the help of UHI .

Listing and mapping of households will provide accurate numbers for population their family size and composition residing in slums. Currently, estimates of population residing in slums are available from District Urban Development Agency (DUDA) and National Polio Surveillance Project as the

immunization micro plans (under NPSP) provide updated estimates of slum and vulnerable populations.

Once the ASHA are deployed they will list all households and fill the Slum Health Index Registers (SHIR) including the number and details of family members in each household. This data will be compiled for each city and will provide the population composition of slums and key focus areas. This will also help the urban ASHA know her community better and build a rapport with the families that will go a long way in helping her advocate for better health behaviours and link communities to health facilities under the NUHM. It is expected that once the household mapping is completed in cities, the number of ASHAs will be reviewed and adjusted upwards or downwards and the geographical boundaries of the coverage area for each ASHA would be realigned. This is due to the reason that the actual population may be higher or lower than the original estimate used for planning.

**Health Facility Survey:**

**Slums of the cities have been mapped out, 550 Urban PHCs are functional till date against sanctioned 558 UPHC, Facility mapping is started with the help of Data Resource Cell in Directorate of Medical Health.**

**Urban-Primary Health Centres (U-PHCs)**

Urban Primary Health Centres (U-PHCs) is the most peripheral fixed health facilities for the urban areas under NUHM and are expected to serve as the first point of contact for the community. Each U-PHC is being established to approx 50,000 populations with locations that enable access for urban poor communities. IPHS guidelines for PHCs is being followed and quality assurance mechanisms will put in place.

Communication activities is being taken up at the UPHC level for popularising the presence of the UPHC, Signage boards that guide the patients from the main road and key transport hubs to the UPHC are being displayed. Citizens’ Charter, Essential Drug List and Immunization Schedule and other entitlements under various government schemes such as JSY and JSSK. Health messages of safe motherhood, child care, family planning and control of common diseases are being displayed at the UPHCs for the community to demand timely and quality health services. Safe Motherhood booklet and Mother Child Protection Cards are made available at the UPHCs for use by pregnant women..

The underlying principal will be to strengthen existing and functional health facilities to convert them into Urban PHCs and new such facilities are being proposed as needed. All facilities catering to a population of 50,000 population.

Total 147 Urban Health Posts and Urban Family Welfare centre running from State budget, are being strengthened Those Urban Health Posts funded by State budget which are not within or close to the slums and do not have adequate space for up-gradation to UPHCs have been shifted to other rented premises located within or close to slums.

231 Urban Health Posts were funded under Urban RCH have been upgraded as UPHCs

160 New UPHCs are being established

**City wise UPHCs detail and Manpower sanctioned**

<b>TOTAL</b>					<b>37</b>

**New Construction of 3 UPHCs (Kalyanpur, Gwartoli and Krishnanagar) in Kanpur Nagar is being proposed** –Detail proposal is annexed

Note: 147 Extra Staff Nurses are being proposed for State budgeted UPHCs to conduct ANC, PNC, Normal Delivery services & FP services, other than this 203 extra SNs are being proposed 123 delivery points (3 SNs per UPHCs for 24x7 delivery)

**Urban-Community Health Centres (U-CHCs)**

Urban Community Health Centres (U-CHCs) are envisaged to provide in-patient and specialized care to urban population and are planned for about 2.5 lakh population each. The state proposes to strengthen 8 existing urban hospitals as U-CHCs in the state capital as follows

1. **Lucknow:** 8 Bal Mahila Chiiktsalayas and Prasuti Grahs will be supported with specialist doctors Facilities are functional as first referral unit for all UHPs in urban areas of Lucknow city and providing Maternal and child health services . Under NUHM these are being established as U-CHCs by providing specialists, staff nurses, support staff, data assistants

**Extra HR sanctioned at 8 BMCs**

s.no.	BMC	HR at BMCs							
		Specialists					SNs	Data Assistant	Support Staff
Gynecologist	Pediatrics	Anesthetist	Radiologist	Physician					
1	Aishbagh	1	1	1	1	1	1	1	4

5	Faizabad road	1	1	1	1	1	1	1	4
6	Silver Jubli	1	1	1	1	1	1	1	4
7	Redcross	1	1	1	1	1	1	1	4
8	Turiaganj	1	1	1	1	1	1	1	4
	<b>Total</b>	<b>8</b>	<b>8</b>	<b>8</b>	<b>8</b>	<b>8</b>	<b>8</b>	<b>8</b>	<b>32</b>

2. **In Varanasi** –Urban Population of City Varanasi is 11,98,491. 24 UPHCs are functional till date and they are providing primary health care. According to norms State has to establish 1 UCHC on each 2,50,000 Urban population so 3 UCHCs are being proposed in Varanasi as follows-

- a. **Maternity Home (Durgakund & Chowkaghat ) in Varanasi** are being proposed as UCHCs. Budget for renovation and HR being proposed

**Extra HR proposed at Maternity Home:**

s.no.	BMC	HR at Maternity Home								
		Specialists				EMO	LT	SNs	Data Assistant	Support Staff
Pediatrics	Anesthetist	Surgeon	Pathologist/ Radiologist							
1	Durgakund	1	1	1	1	1	1	3	1	4
2	Chowkaghat	1	1	1	1	1	1	3	1	4
		<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>	<b>6</b>	<b>2</b>	<b>8</b>

- b. **New Construction of UCHCs in Shivpur of Varanasi** being proposed .

### **Strengthening Outreach to urban slums**

There is a three pronged strategy for outreach under NUHM:

- **Intensifying the reach of ANMs**
- **Urban ASHAs**
- **Urban Health and Nutrition Days**
- **Outreach Camps**
- **IEC/BCC Activities**

### **ANMs**

The ANMs are being hired as per gap analysis at the U-PHCs and are catering to a population of about 10,000 each. Areas have been identified. HQ of ANM is UPHC and they are reporting to MOIC of UPHC. They will work in close cooperation with the ASHAs and AWWs in their area of coverage and refer for institutional care to U-PHCs, U-CHCs and other Govt. hospitals in the cities.

147 ANMs are already posted in Government Urban Health Facilities. The remaining ANM posts 2898 ANMs are being hired. They are being trained in different programme like Mission Indradhunash and VHND . Because of non availability of training modules from GoI State could not arrange the modular training and budget could not be utilized . This budget for training of ANMs has been kept committed this year also .

### **Urban ASHAs**

The urban ASHA will work on the pattern of rural ASHA and serve as the link between urban poor and health services. There is an ASHA planned for 200 – 500 slum households each and will be assigned such that all slums are covered. These frontline workers will be trained as per the ASHA training modules. The existing training modules for rural ASHAs and the pool of trainers created already will be used for the same. Any specific content on urban contexts, if created for capacity building of ASHAs, the same shall be included in the training plan and content.

Urban ASHAs will conduct the house listing in their assigned area and record the details of all families, married women of reproductive age, pregnant women and children as per the questionnaires which be prescribed or developed. This will help them build rapport with the community and also gain a good understanding of the health needs in her area. It is expected that the actual population listed by the ASHAs may be higher or lower than the population originally used for planning and ASHA selection and assignment. These will be adjusted over time with the objective of providing complete coverage to the slum residents.

The ASHAs will start providing services once they are trained and have completed the mapping of households and Slum Household Index Register (SHIR). They will then be paid

Incentives based on their performance for the following activities:

- a) Organize Urban Health and Nutrition Days
- b) Organize outreach camps
- c) Organize monthly meeting of MAS
- d) Attend the monthly meeting at UPHC

- e) Organize community meeting for strengthening preventive and promotive aspects
- f) Maintain records as per norms like SHIR, meeting minutes, outreach camp register
- g) Additional immunization incentives for achieving complete immunization in her area
- h) Incentives built in schemes such as JSY, RNTCP, NVBDCP, Family Planning, Home based newborn care etc.

Total 6813 Urban ASHA have been approved. Selection process of ASHA has been started. Budget for training of Urban ASHA has been released to Districts (17 training centres)

### **Mahila Arogya Samitis (MAS)**

Mahila Arogya Samitis will function as empowered groups of women that will enable the urban poor communities to access their health entitlements under the various government schemes. Each MAS will consist of 10-12 women MAS will serve as catalysts for behaviour change in communities in their area for practising healthy behaviours and accessing preventive, promotive and curative health services. They will also advocate with the government system for accessible and quality health care for urban poor. Capacity of existing community based institutions will be built to evolve to MAS and if needed new MAS can be set up. 2 MAS per ASHA were sanctioned in FY 2013-14 in NUHM ROP but as per discussion of CP division with Gol 1 MAS per ASHA is being proposed and budget for formation of 1 MAS per ASHA has been kept committed this year

### **No of Urban ANMs , ASHAs and MAS**

Note : 232 new Urban ASHA (100 in G.B.Nagar and 132 in Kanpur Nagar) are being proposed

### **Urban Health Sanitation and Nutrition Days**

Urban Health and Nutrition Days will be organized at each Anganwadi center at least once a month. UHNDS will be organized by close coordination between Anganwadi worker, ASHA and ANM and provide services at the doorstep of the urban slum community. In case there are no Anganwadi centers, the ANM can find a common place in the community to conduct the UHND in coordination with the ASHA. The services will include the following:

- Early registration of pregnancies, antenatal care for pregnant women including IFA, TT, BP, counselling for nutrition during pregnancy, birth preparedness and ANC check-up
- Screening and referrals of high risk pregnancies
- Creating awareness about government schemes such as JSY and JSSK and promoting institutional deliveries
- Routine immunization for children including Vitamin A administration
- Treatment of minor ailments including diarrhoea and ARI among children
- Growth Monitoring for children under six years for early identification of malnourished children and counselling and referral as needed
- Counselling for IYCF, care during pregnancy, family planning
- Distribution of condoms and pills, counselling for IUCD and ligation to women who have completed their families
- IFA supplementation and deworming for adolescents
- Awareness about safe drinking water and sanitation practices, distribution of chlorine tablets as needed

Supplies for UHNDS will be procured and supplied by the UPCs where the ANM is based. The ANM can refer cases that need medical attention to the UPHC OPD or the special clinics being run there. The reports generate from the UHNDS will be included in the UPHC performance and all pregnant women registered will be entered in MCTS by HMIS/ MCTS Operator based on the information provided by the ANM after each UHND..

### **Outreach Camps**

Special Outreach Camps will be planned with two main objectives:

- Reach out to vulnerable populations/ slums that are may not access services at UPHCs or UHNDS such as the homeless, rag pickers, street children, rickshaw pullers, constructions, brick and lime kiln workers, sex workers and other temporary migrants with health services that are responsive to their special health needs.
- Provide more specialised health care services closer to the community for specific preventive and promotive care based on epidemiological and population needs. Some examples of such activities include:
  - Chronic Lung diseases in factories
  - Skin cancer screening in industries where there is exposure to carcinogenic agents
  - Screening and treatment for RTIs and STIs among sex workers
  - Screening and referral for cataract among the elderly
  - Screening and referral for TB among high risk populations
  - Screening and treatment for vector borne diseases such as malaria, dengue, Japanese Encephalitis, Acute Encephalitic Syndrome in and after the monsoons.

A panel of specialists comprising of various specialists such as gynaecologists, paediatricians, general physicians, ophthalmologists, dermatologists, chest physicians, epidemiological and occupational diseases will be developed at the city level. As per the need required specialists will be engaged for outreach camps.

The human resource and supplies will be provided for special outreach camps based on the objective and the target population planned to be served. The ANM will take lead in overall organization of the special outreach camps in her area with support from the Urban Health Coordinator. Specialists from the specialists panel created at the city level will be used for these outreach camps and additional specialists may be hired if needed. Reports for these special outreach camps will be compiled as part of the UPHC performance and reported.

#### **IEC activities at facility and community level:**

- **Facility level:** Flex, wall writing, signage board ,standee etc
- **Community level:** Wall writing & hoarding in catchment area of UPHC

#### **Training**

Training ULB, Medical officer, ANMs could not be done because of unavailability of module. Urban ASHAs are being selected & will be trained this year. MAS will be formed & trained . Budget has been kept committed.

#### **Reporting**

Monthly reporting of all UPHCs is being done in HMIS format. MCTS feeding is not started because no MCTS data entry operator available in urban areas hence HMIS/MCTS data entry operators are being proposed under NHM PIP.

#### **Monitoring & Evaluation**

Monthly review meeting of ACMO/Nodal Officer NUHM are being held, detail physical and financial review is being done.
