Gaps in Immunization :

- Coverage of BCG is poor in blocks Pinhat, Akola, Fatehpur Sikari, Khairgarh and Jagner.
- Usually BCG, OPV0 and Hepatitis B0 doses are given at birth time but reporting shows all three are not given at the time of birth even at facility level showing service gap at facility and need focus monitoring.
- 82% percent of Infants 0 to 11 months old who received Measles in entire district and 95 percent of children 9 and 11 months fully immunized which breaking the validation rule as full immunized children must <= children received Measles dose. It needs to check block wise for data correction.
