The mother registration in HMIS portal is 80% however, it is same 80% on MCTS portal. Except 7 blocks in yellow, all blocks have done less feeding in MCTS portal for mother registration. The child registration in HMIS portal is less than that of registration in MCTS portal. According to MCTS portal, The full immunization for children with DOB in April-Jan 2016-17 is 68%. Proper strategy need to be prepared to improve the child registration in HMIS portal as it is 4% less than that of MCTS. HRP registration is also very poor in the MCTS portal which shows that the Data Operators are not getting data for HRPs

#### Gaps in Child care :

- 13 still births are reported from the dist.on 1000 live births while Hariya reported most no. of still births in district.
- 89% births are reported as breast fed within 1 hours of births,It can be seen that early breast feeding has been improved in the district.
- In Azamatgarh 89% children weight at birth and of which 15% LBW . Mehnagar reported all livebirth as LBW it seems missreporting and it needs to be corrected

**Gaps in Immunization :**

No. of Live births and BCG given not corresponding in most of the blocks as per the table and reporting approx. double or > double live births need to be checked accurately. Usually BCG, OPV0 and Hepatitis B0 doses are given at birth time but reporting shows all three are not given at the time of birth even at DH and CHCs, it is showing service gap at facility and need focus monitoring.

**Gaps in Family planning :**

- 67% of total IUCD perform at Subcenter till month so quality and quantity should be a concern to all Family planing mangers.
- Some of blocks do not providing services of IUCD, OCPs and Condom in the last 3 months for family planning. Supply could be an issue for same.
