Grand Total	85.6	67.1	62.9	54.7	39.4	21.8	28.2	2.0

PW registration according to MCTS is 67% it is less than from HMIS (86%) its shows that data entry process is slow in dist and DHQ also has slow data entry in MCTS portal
 Child registration of MCTS in dist is only 55%
 Updation of PW services is showing very poor ie 3 ANC is only 39%, Delivery is Only 22%
 Some of BLocks are showing very less performance on Registration and updation.

Budaun - FY 2016-17 Apr-Mar
Summary Sheet

Maternal health :

Total ANC Reg. of Dist is 84% reported over the period whereas as per AHS it was 61%, early registration is 47% AHS it is 41%. Some of the Blocks are reporting more than 100% of ANC registration which shows there is some duplication in data, seems lack of understanding on data element. ANC-3 is showing 45% of District whereas in AHS it is 23%.

Registration of mother and children in MCTS is poor and updation is also very low, so here we need to focus the blocks and there is no arrangement for registration and updation at DHQ for MCTS.

Total delivery reported by Dist is almost 62% in over the period i.e. 38% Deliveries are still missing in reporting. Institutional Del against estimated delivery is 44% whereas AHS shows 50%, Home deliveries are not reported adequately in HMIS reported only 18% to estimate. Reporting of PVT is 1% though the registration in Pvt Facility is about 6%, data needs to be checked and verified. From pvt facility there seems opportunity gap in reporting. Discharge within 48Hrs is 59% means that only 41% of delivered women's are staying at facility after delivery. JSY paid is showing 90% and as per AHS the corresponding figure is 67%.

PW having HB level<11 is 19%, 3 Blocks of Dist reported less than 5% so achievement showing very low, Most of the cases are checked and treated at DH and CHC level facility so these are showing very high. PW having HB level<7 is around 2% of Dist, 9 of Blocks reported 0% over the period. Hypertension cases are 2% need to focus. Identification of Hypertension cases is very poor at all block level even DH need to focus on same and 3 blocks showing Identification of Hypertension cases is still zero. Identification of hypertensive cases are mostly (49%) by SC, data needs to be checked.

Complications cases are reported by Dist. is 8% to total Delivery, DHQ shows 37% complication to total delivery so here is need to check and verify the data source, 4 Blocks are not reported data over the period that's why the total complications are showing poor of Dist. these Blocks are need to check data because most of the complications cases are identified and managed at CHC. % C-Section reported around 2%, only DH hospital and Qaderchowk CHC reported data for C- section, but this is suspected Qaderchowk reported most of the del as C-section. Other CHCs of Block are not performing C-Section. Need to check data wherever C-Section has Conducted.

Child Health

Still Birth against total Delivery is reported only 1.2% by Dist. Most of the Blocks are reported less than 1% of Still Birth in over the period, it seems very low reporting and Dahagwan showing zero reporting of still birth over the period of time. Weight at birth against total live Birth is reported 88% by Dist whereas AHS is only 16%. Newborn having <2.5Kg is 11% of Dist but AHS shows 37%. Dhq reported 25% of LBW NB needs to be checked, all Blocks are reported below AHS are need to focus on this. % NB breast fed within 1 Hr is 91% reported in HMIS by Dist but AHS shows 22% all the Blocks reported near about 100%.

Immunization

% of BCG is Reported to estimated is 78%, pvt facility are not reporting BCG. 60% of BCG doses are reported from SC level facilities. HB0 dose are reported only 22% against estimated facility wise distribution of HB0 shows that most of HB reported from CHC & PHC level facilities which is as per protocol because HB0 dose should be given by facility before 24 hrs of del. Inst. delivery of dist is 43% but HB 0 coverage only 22% it's seems service not given to all NB. Asafpur and Binawar are showing more full immunization than Measles need to check data. Measles doses are reported almost 63% to estimate by Dist seems 15% Drop-in from BCG. Full immunization is 63% whereas AHS shows 31%. Some of the blocks are showing full immunization equal to measles this mean there are some misunderstanding about the full immunization definition.

-Family Planning.

Achievement of FP (total) is around 5%, Limiting method is 3% and spacing is 12%. Male sterilization is 1 in over the period. Some of the Blocks are not reporting any of method so achievement of dist showing very low.

Gaps in HRP :

PW having HB level<11 is 19%, 3 Blocks of Dist reported less than 5% so achievement showing very low, Most of the cases are checked and treated at DH and CHC level facility so these are showing very high.

PW having HB level<7 is around 2% of Dist, 9 of Blocks reported 0% over the period.

Hypertension cases are 2% need to focus. Identification of Hypertension cases is very poor at all block level even DH need to focus on same and 3 blocks showing Identification of Hypertension cases is still zero. Identification of hypertensive cases are mostly (44%) by SC, data needs to be checked.

Complications cases are reported by Dist. is 7% to total Delivery, DHQ shows 37% complication to total delivery so here is need to check and verify the data source, 4 Blocks are not reported data over the period that's why the total complications are showing poor of Dist. these Blocks are need to check data because most of the complications cases are identified and managed at CHC.

% C-Section reported around 2%, only DH hospital and Qaderchowk CHC reported data for C- section, but this is suspected Qaderchowk reported most of the del as C-section. other CHCs of Block are not performing C-Section. need to check data wherever C-Section has Conducted.

AHS (2012-13)					15.6		37.7		22.4

Gaps in Child care :

Still Birth against total Delivery is reported only 1.3% by Dist. most of the Blocks are reported less than 1% of Still Birth in over the period, it seems very low reporting and Dahagwan showing zero reporting of still birth over the period of time. Weight at birth against total live Birth is reported 87% by Dist whereas AHS is only 16%.

Newborn having <2.5Kg is 11% of Dist but AHS shows 37% . Dhq reported 25% of LBW NB needs to be checked, all Blocks are reported below AHS are need to focus on this.

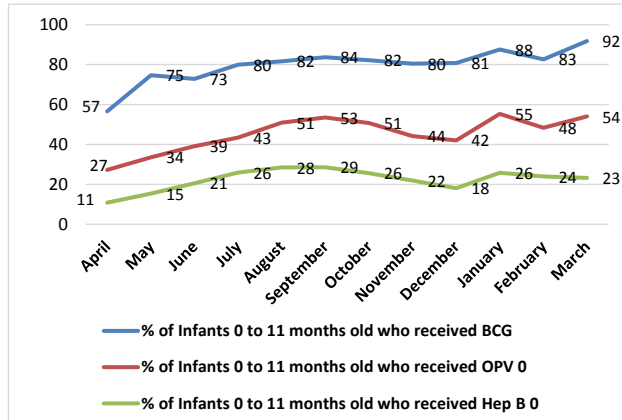

% NB breast fed within 1 Hr is 91% reported in HMIS by Dist but AHS shows 22% all the Blocks reported near about 100%.

AHS											47	30.7

Gaps in Immunization :

% of BCG is Reported to estimated is 80%, pvt facility are not reporting BCG. 60% of BCG doses are reported from SC level facilities.

HB0 dose are reported only 22% against estimated facility wise distribution of HB0 shows that most of HB reported from CHC & PHC level facilities which is as per protocol because HB0 dose should be given by facility before 24 hrs of del. Inst. delivery of dist is 45% but HB 0 coverage only 22% it's seems service not given to all NB.

Asafpur, Ujhani, Wazeerganj and Binawar are showing more full immunization than Measles need to check data.

Measles doses are reported almost 65% to estimate by Dist seems 15% Drop-in from BCG. Full immunization is 64% whereas AHS shows 31%

some of the blocks are showing full immunization equal to measles this mean there are some misunderstanding about the full immunization definition
