- Mother registration (70%) on MCTS portal is less than mother registration in HMIS (97%). Child registration is also good as compared to the child registration in HMIS. Most of the child were given BCG (95%), and 89% child received full immunization in 12 months after its registration. However, full immunization in HMIS is 92% right now. It indicates poor updation on MCTS portal or rendered services. Updation of rendered mother and child services needs to improve.
