- Sindhauli block is very poor in registration in MCTS in comparison to HMIS registration
 - updation in MCTS is very Poor of mostly blocks and DHQ.
 - HRP covering in MCTS is only 3% so here is need to focus on line listing of HRP and check the documentation of ANMS.

FY 2016-17 (Apr to March)

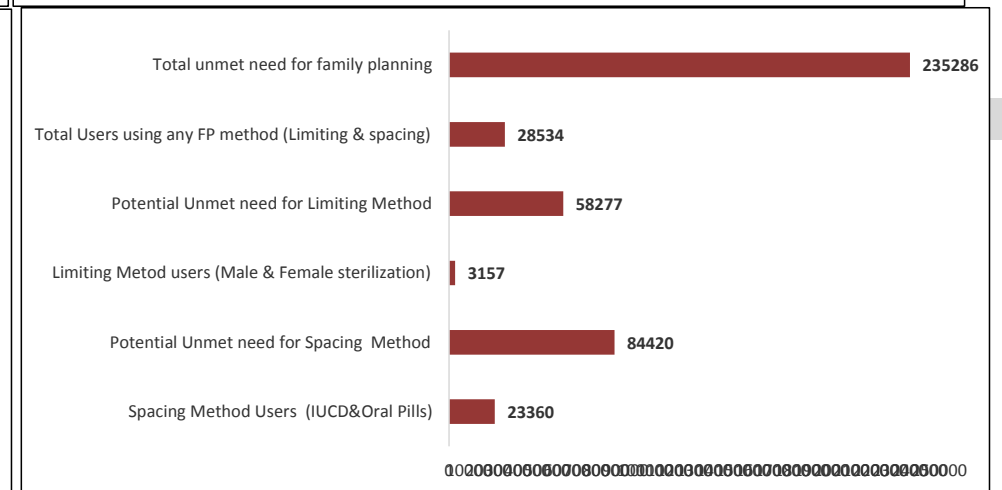

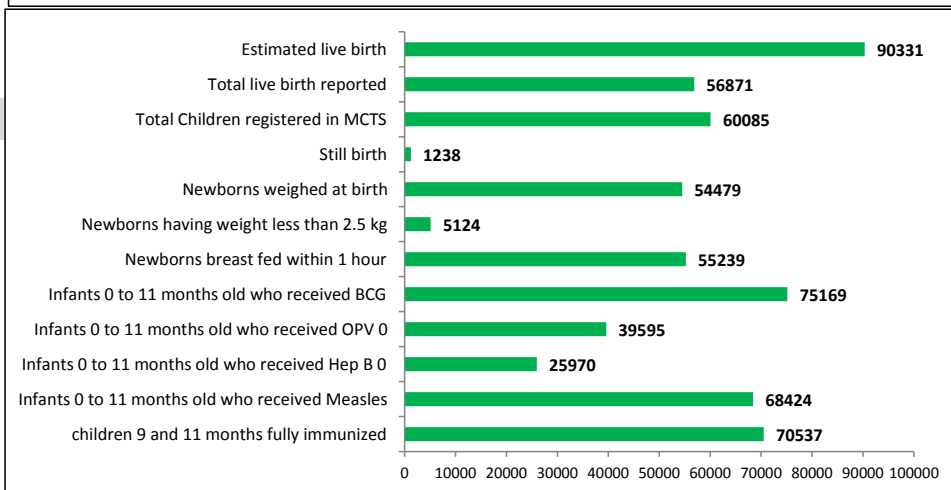

Shahjahanpur At A Glance

Ante Natal care (ANC)

Delivery care

Maternal health:

➡ Total ANC Reg. of Dist is about 88% reported over the period whereas as per AHS it was 52%, early registration is about 47% AHS it is 44.5%. All registered PW do not receiving 3 ANC as registration trend is 88 whereas 3 ANC receiving women is only 64% so here is need improvement as per identified Gaps such as improve the source documentation of ANMs as well as reporting mechanism at the block level during the reporting time.

All Private facilities are not reporting ANC ,immunization and Family planning services only participate in delivery reporting that is only 4% of the total estimated target it is not actual figure so here is need to verify their monthly reported figure as well as sensitizes regarding timely ,regular and full reporting as per prescribe HMIS.

- Total delivery reported by Dist. is 66% in over the period i.e. 34% Deliveries are missing. Institutional delivery against target only 41% in which only 4% of private facilities.
- Home deliveries are not compiled adequately from the ASHAs during the report compilation on SCs by the ANM.it is in HMIS only 25% to estimate.
- Blocks have more than 40% missing delivery are Sindhauli,Tilhar,khutar,Bhawalkhera and Kanth.Here is focusing on improve home delivery report that will be compile by respective ANMs during the monthly HMIS reporting
- Discharge with in 48Hrs is 41%.it means only 59% of delivered women's are staying at facility after delivery whereas AHS shows 73% of women are receiving PNC within 48 hour at Facility.so here is need the improve facility level PNC services at the facility level.
- Only 1.0% of severe (Hb <7) anemia treated rate at the facility level.Block Jaitipur and khutar not reported any single value of Severe caces.on other hand out of 14 are showing below 2% FW with hypertension diagnosis.Here is need to Improve availability of instruments on VHND sessions and the skill power of ANMs.
- During Pregnancy maternal Complications cases are reported by Dist.is only 8% of total reported deliveries, DHQ showing only 3% complication to total delivery so here is need to check data source,2 Blocks(Bhawalkhera and Kanth) are not reported data over the period that's why the total complications diagnosis rate is very low. Mostly block have not proper documentation and reporting regarding the complicated cases that they are treating and managing at the facility level.
- % C-Section reported by DH hospital only 3% and FRU Tilhar not providing C-section services over the period.

Child Health

- Still Birth against total Delivery is reported 2% by Dist and DH showing 4.7% here is need reporting source.Most of the Blocks are reported equal or more than 2% of Still Birth in over the period.Here is need to check the missuses of Oxytocin Injection during the delivery and the skill of staff nurses/delivery staff.
- Newborn having <2.5Kg is only about 9% of Dist but AHS shows 28.1% only few blocks are near about AHS .
- New Born breast fed within1 Hrs is 97% reported in HMIS by Dist but AHS shows 41% all the Blocks reported near about 100% here is need check the data sources and reporting.

Immunization

- District level reporting of BCG0 is about 82%, whereas OPV0 is 42% and Hep0 is only about 27% whereas institutional delivery is 41%.this is showing birth dose are not provided Corresponding at facility level. Here is need to improve birth doses services at facility level.
- Measles doses are reported 74.7% and 77.1% is full immunization against the estimated(Here is some Data problem).whereas 77% full immunization as per WHO monitoring data.

Family Planning

- Achievements of total FP services is only 11% as per AHS (12-13) it is 13.1% here is need to check or need to improve data and services whereas Limiting method is only 5% and spacing is about 27%.status of male sterilization is very poor over the period.

➡ Here is need a meeting with Private facilities/nursing home under the DM,CMO and IMA president to advocacy regarding the actual number of delivery and other Facilities such as immunisation, FP, ANC and PNC reporting as per HMIS format.

➡ Improve the gap of missing delivery by develop the mechanism to compilation of ASHA wise Home delivery/other services information during the ANM's HMIS reporting as per the decide reporting dates.

➡ Improve the reporting percentage of Preg. with Compl. Attended at facilities.help of NMs in non HPD blocks by the mentoring of delivery staff with using of delivery case sheet and develop birth skill.

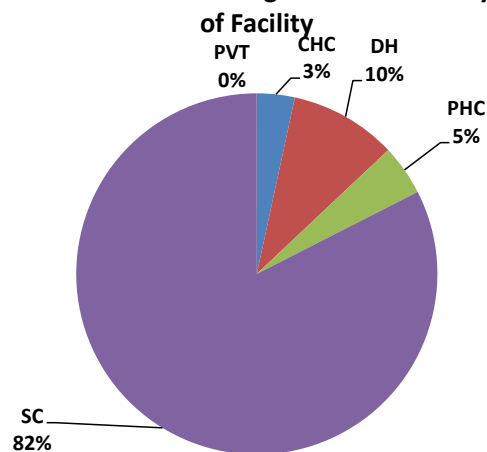

➡ improve the still birth status of district that is 2% by breck the miss use of Oxitocin injection at delivey point with the help of CMO/MOICs .

AHS (2012-13)			52.1		44.9				28.4

Gaps in ANC Registration :

1. ANC registration of dist. is 90%. DHQ dadraul and khudaganj reported more than 100%.whereas AHS 2012-13 showing ANC registartion 52%
 - 2- ANC Registration in 1st trim. is 48% which is repotred nearest to AHS 12-13 i.e. 44.9%.
 - 3- 3 ANC is showing 67% of Dist whereas in AHS it is about 28% its seems like is over reporting.
- all registered PW do not recieve 3 ANC as reg trend is 90% but 3 ANC is 66%.

AHS (2012-13)					31.2		28.1		41.2

Gaps in Child care :-

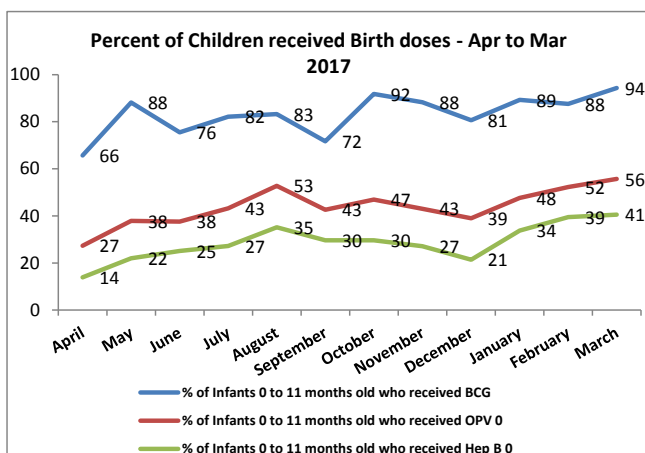

2.1% still births is reported at the district.block Banda,Bhawalkhera,Kalan,Khutar,Mirzapur,Powayan and Sidhouli showing very high still birth in last 11 month so here is need to check souce document and check the understanding the concept of still birth.

- 97% births are reporting as breast fed within 1 hours. here is need to check data quality. As per AHS 2012-13 breast fed is 41.2% only.
- 96% children weight at birth and of which only about 9% LBW while AHS 12-13 showing againest estimated as 31.2% & 28.1% respectively.

Gaps in Immunization :

- The district average of BCG vaccine distribution is 83% as per estimated target. Kalan block has reported more than 100%, here is needs to be check and verified data.
- Only DWH and nigohi are showing more than 50% of Hep.B-0 dose to the Est. live births, other block are showing poor services of birth doses in which Bhawalkhera, Tilhar and Kanth blocks showing blow and equal 10% coverage of Hep0 doses.
- Usually BCG, OPV0 and Hepatitis B0 doses are given at birth time but reporting shows all three are not given at the time of birth even at DH and CHCs, it is showing service gap at facility level So here is need to focus on monitoring.

Gaps in Family planning :

- Total achievement FP services is only 12% (spacing is 31 and limiting is 5%) here is need to improve the performance.
- 62% of total IUCD perform at Sub center level, PHC and DH level is showing low%.
- Mostly blocks are showing low services of IUCD, OCPs and Condom.
- Private facility also showing low reporting in FP services.
