**Kanpur Dehat - FY 2016-17 (April-Feb)
Summary Sheet**

Maternal health :

ANC Registration Reported in HMIS in the month of April - March against estimated is 85 %. According to AHS it is 64.7% which considerably shows better value. Contribution of SC in ANC registration is 72 % which is indicated good outreach coverage, whereas ANC registration in DH is considerably (12 %) .were as CHC & PHC Contribute only 13 % & 3% only .

As we compared to HMIS, MCTS is reporting ANC registration of 60 % against estimated in the month of April - March , which shows an opportunity gap of approximate double registration. This is suggestive of poor MCTS entries by blocks. District Combined Hospital have poor ANC registration 0.09%. Major difference is seen in Akbarpur (35 % difference), Jhinhak (27%), & Amrodha (66%) , This shows MCTS Reg. is more then the HMIS. Reflect the over reporting data need to be cross verify .sugg estive that to collect the data from the field and increase the ANC registration under MCTS Portal through our MCTS Operator . MCTS Reg. is always less then or equal to the HMIS.

District is reporting 36 % early ANC registration as compared to AHS data of 49%, which is relatively low. This is suggestive of under reporting or perception of FLWs (Field level worker's) about registering a pregnant women after TT injection. Percentage of 3 ANC checkups reported in HMIS (58 %) as compared to AHS data (33%) is indicated good coverage of reporting. Data needs to be verified. MCTS service updation of 3 ANC is also shows (37 %) , but when we drill down the Block level data , Block Amrodha , Rajapur & Malaisa shows only 11 % , 23 % & 05 % need to be increase on priority basis on this block.

Delivery :-

Delivery reported is 42 % , a huge part of delivery is missing (58 %) against estimated. Even when pregnant women are registered (85 % ANC registration) are not tracked till delivery gap of 43%, Block Malesa , Maitha , Sarvankheda & sandalpur is reported less then 50 % . Situation in MCTS reporting is much poorer that is more (58 %), when we drill down the MCTS Data Amrodha (11%), maitha (16%), Jhinhak (32 %) , Maelesa(5%) , & Rajapur (23%). Need to be instruction given to improve the data. According to the HMIS data district reported only 6%, home delivery . some block Rajapur(3%), Ghinghak(6%) reported . SC contributed only 1% deliveries are being reported, this shows reporting gap. Or If this gap is covered around 25% missing deliveries can be covered. There is also need to activate some new delivery point's , so that they covered some missing delivery.

HRP and Complication Detection :-

Trend Analysis of HRP woman from April to March. Slope is considerable i.e.decrease of 2.4 % as per HMIS < 7% HB, need to verify the reason why there was decrease in reporting. It is a mandate to treat severe anemic women at block facilities and DH , but from table in HRP sheet it is find that many blocks are not providing the services or not reporting like Malesa, Maitha & sarvankheda, sandalpur Reported zero as per HMIS.

At SC level HRP detection is very poor which raises the issue of equipment availability or skill of the FLW or there is operator problem need to be verify .Complication detection in district is 7 % . District Hospital is also not reporting the complication need to address. & Instruct the related staff nurse to report the data.

Child Care and Immunization:-

Out of estimated live births 42% live births are reported in HMIS and 45% in MCTS. Amrodha ,& Malesa difference in HMIS and MCTS is around more then 50%.Need to address this issue to the particular blocks. child registration of MCTS is 44% against 45% in HMIS.

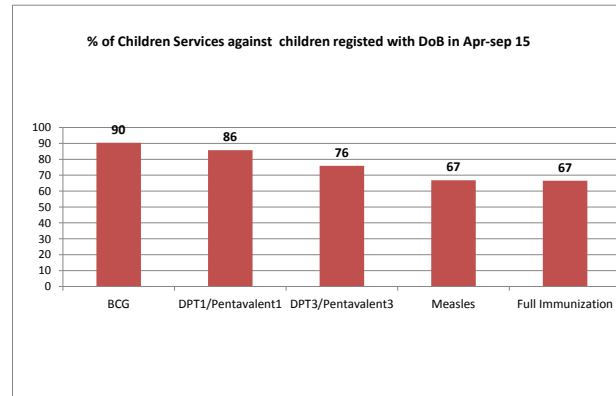

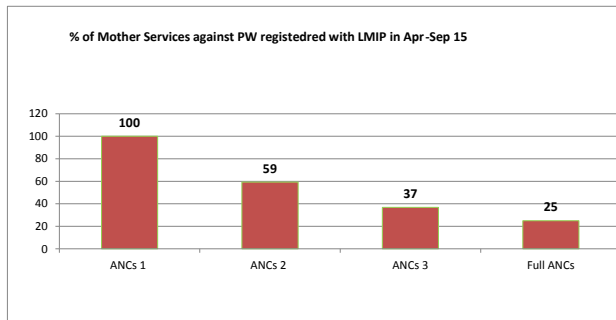

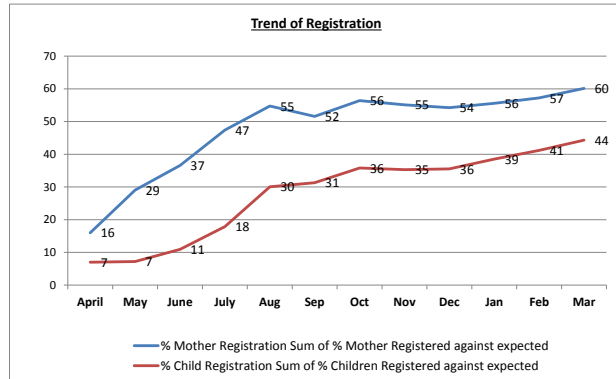

Immunization of birth dose i.e. BCG 73 % since it can be administrated till one year, OPV0 is 42% and HepB0 is 22%. Thus it reflects that birth doses are not given at higher facility level like CHC and DH where these antigens are available 24X7. Need to address the issue to the MOIC. Full Immunization status in MCTS is good which is only 66% where as district is reporting 70 % in HMIS. shows Good Reporting .

Family Planning :-

All the block spacing method report in HMIS is more then 66 % . 83% IUCD Insertion at SC facility.but need to be focus to verify the Quality of data .increase the service & utilization of service at Sub center & CHC because mostly couple accept IUCD for family planning from SC & CHC. Condom & Oral Pills Distribution is shows high in all the Block's . over all permanent method district reporting just 0.9 % . very important to focus on family planing program, data should be verify in spacing method.

HMIS/MCTS Gaps

- Mother registration in HMIS is 85 % but in comparison to MCTS its shows only 60 % . child registration in MCTS is just only 44 % against HMIS is 45 % , it's huge gape between mother & child registration in HMIS & MCTS Portal . need to be increase the MCTS Portal registration.
- 3ANC Checkup is 37 % , delivery 27 % and child full immunization of 2015-16 is 67 % .
- HRP Reported 4 % asper MCTS. need to verify the data or record whether all HRP reported or not .

Gaps in Immunization :

- No of Live births and BCG given not corresponding in most of the blocks as per the table and reporting aprox.> 73.6 % of live births . Akbarpur Block Reported only 28 % , instead of DH is include in this block.
- District Reported only 22 % Hep.B-0 dose to the total live births and rest blocks were not able to do so. maitha reported Zero percent .This shows child are not immunized during Institutional delivery at CHC & PHC.
- Usually BCG, OPV0 and Hepatitis B0 doses are given at birth time but reporting shows all three are not given at the time of birth it is showing service gap at facility and need focus monitoring.
- Block Amrodha ,Jhinjhak , Derapur, Rajapur & Maitha reported more then 100% in full immunization .Data verify may be over reported or some problem in reporting. Akbarpur Block reported only 19 % full immunization.

Percent Distributions of new IUD insertions by facility type

Gaps in Family planning :

- 83 % of total IUCD perform at Subcenter till month so quality and quantity should be a concern to all Family planing mangers.
- Majority of All the blocks Akbarpur, Ghinhjak, sandalpur & Sarwankheda Reported more then 80% providing services of IUCD, OCPs and Condom in this month for family planning , Data need to be verify , May be over reporting.
- District reporting 1.18 % in sterilization.

List of Indicators covered in HMIS and MCTS

S.No.	Domain	Indicator	Numerator	Denominator	Page no.
1	MCTS	% of mother registered in MCTS against estimated	Total # Mother registered in MCTS	Estimated Pregnancies	3
2	MCTS	% Children registered against estimated	Total # Children registered in MCTS	Estimated live births	3
3	MCTS	% High risk PW reported in MCTS	Sum of pregnant women having hb<7 and any other maternal complication	Total # Registered Mothers in current year	3
4	MCTS	% of Mother received ANC 3 against registered PW with LMP 2014-15	Mother (LMP 2015-16) received ANC 3	Total # pregnant women registered with LMP in 2015-16	3
5	MCTS	% of PW delivered against registered with LMP in 2014-15	Total # Pregnant women (LMP 2015-16) delivered	Total # pregnant women registered with LMP in 2015-16)	3
6	MCTS	% of children received full immunization against children registered in 2014-15	Total # children (DoB 2015-16) received full immunization	Total # Children (DoB 2015-16) registered	3
7	ANC	% of ANC registered to estimated Pregnancy	Total # ANC Registered	Estimated Pregnancy	4
8	ANC	% of ANC registered within 1st trimester	Total # ANC Registered within 1st trim	Total # ANC Registered	4
9	ANC	% of ANC received TT2/Booster	Total # Pregnant women received TT2/Booster	Estimated Pregnancy	4
10	ANC	% of ANC received 3ANC checkups	Total # pregnant women received 3 ANC check ups	Estimated Pregnancy	4
11	Delivery	% delivery reported	Total # Delivery reported	Estimated Delivery	5
12	Delivery	% of Unreported (Missing) Delivery	Total # Delivieri not reported	Estimated Delivery	5
13	Delivery	% of institutional deliveries among estimated delivery	Total # Institutional Delivieri	Estimated Delivery	5
14	Delivery	% of delivered women discharged within 48 hours	Total # Delivered women discharged within 48 hours	Total # Deliveries conducted at facility	5
15	Delivery	% of JSY incentive paid to mothers	Total # JSY Incentives paid to mothers	Total # Deliveries conducted at facility	5
16	HRP	% of having Hb level <11	Number having Hb level<11	Estimated Pregnancy	6
17	HRP	% of severe (Hb <7) anemia treated rate at institution	Total # Severe (Hb <7) anemia treated at institution	Total # ANC Registered	6
18	HRP	% of PW with hypertension	Total # Pregnant women with Hypertension (BP>140/90)	Estimated Pregnancy	6
19	HRP	Abortion rate	Total # Abortion (spontaneous/induced)	Sum of Live birth, Still birth & Abortion	6
20	HRP	% Pregnant women having Obstetric complication attend at facility	Total # Pregnant women having Obstetric complication attend at facility	Total number of deliveries conducted at public facilities	
21	Child Care	% of Still birth	Total # Still Birth	Sum of Live birth & Still birth	7
22	Child Care	% of newborns weighed at birth	Number of Newborns weighed at birth	Total # Live Births	7
23	Child Care	% of newborns having weight < 2.5 kg	Total # newborns having weight < 2.5 kg	Total # Live Births Weighed	7
24	Child Care	% of newborns breast fed within 1 hour	Total # newborns breast fed within 1 hour	Total # Live Births	7
25	Immunization	% of Infants 0 to 11 months old who received BCG	Total # Infants 0 to 11 months old who received BCG	Total # Estimated Births	8
26	Immunization	% of Infants 0 to 11 months old who received OPV 0	Total # Infants 0 to 11 months old who received OPV 0	Total # Estimated Births	8
27	Immunization	% of Infants 0 to 11 months old who received Hep B 0	Total # Infants 0 to 11 months old who received Hep B 0	Total # Estimated Births	8
28	Immunization	% of Infants 0 to 11 months old who received Measles	Total # Infants 0 to 11 months old who received Measles	Total # Estimated Births	8
29	Immunization	% of children 9 and 11 months fully immunized	Total # children 9 and 11 months fully immunized	Total # Estimated Births	8
30	Family Planning	% achievement for limiting method	Total # Sterilization (Male & Female)	Potential unmet need for limiting method	9
31	Family Planning	% achievement for spacing method	Sum of IUCD and oral Pill users	Potential unmet need for spacing method	9
32	Family Planning	% of Total family planning service provided	Sum of Spacing and Limiting method's users	Potential unmet need for FP Method (Limiting & Spacing & Est Condom users &	9
